Crown's Continuous Extraction System for Hemp & CBD Oil advantages:

- Continuous process backed by 70 years of oilseed extraction and 30 years of botanical extraction with a proven reputation as a trusted, innovative partner
- Scalable from 5-50+ MTPD input capacity to keep you on track with growth targets
- Fast speed to market, typically 4 to 9 months
- Environmentally responsible, >99% solvent recovery from oil and spent biomass with Crown's energy-saving Desolventizing system
- Optimized for maximum oil extraction with lowest total operating costs
- Low labor requirements only 2 plant operators needed
- Multiple solvent options tailored to operational needs
- Piloting capabilities from bench top to multiple tons per day, simulating real-world processing in a controlled, confidential environment
- Developed by a global leader in extraction with a proven reputation as trusted, innovative partner
- Good Manufacturing Practice (GMP) compliant
- Extremely safe to operate - Class 1, Division 1 Certification for explosion proofing and safety

From Piloting to Production, Crown is your End-to-End Solution Provider

Stay ahead of the competition with Crown's expertise and state-of-the-art Innovation Center. Our 15,000 square foot fully functional plant offers controlled, confidential piloting—enabling you to explore new CBD products, enhance existing products and bring new revenue streams to market faster. Our technical trainings keep your workforce educated for increased safety and productivity. Tap into our deep process engineering knowledge to improve operational efficiencies and processing capacity, and confidently honor commitments knowing our comprehensive aftermarket services deliver problem-solving expertise, superior parts and on-site support where and when you need it. With Crown's full-scale support throughout the product lifecycle, your operation is equipped to realize more opportunity and profitability.

Scale-Up Fast To Profitably Meet Demand With Crown's Continuous Extraction System for Hemp & CBD Oil.
