

Your **end-to-end** solution to end landfill costs

Protein Lipid Upcycling System™ (PLUS)

Crown's expertise upcycles waste into saleable products.

Reduce landfill disposal costs up to 100% and achieve sustainability goals while boosting profitability with **Crown's Protein Lipid Upcycling System™ (PLUS)**. As the global leader in crush, Crown's proven expertise in process engineering and equipment delivers a custom and complete process technology solution to transform oil-laden waste and DAF material into saleable cake/meal and oil products. Don't let opportunity go to waste, add significant value to your operation with **PLUS** from Crown.

**Landfill
Reduction**

Protein Lipid Upcycling System™ (PLUS) advantages:

- 100% landfill reduction
- Substantial margin enhancement from secondary value stream
- Achieve sustainability goals with a custom waste-to-value system
- Efficient, economical approach to oil-laden food waste products
- Consultative approach combines expertise in engineering, process design, commissioning and training
- Buyer contacts and connections support sales of PLUS products
- End-to-end system tailored to your unique operating environment
- Pilot plant testing evaluates options to determine best solution

Our tailored approach delivers higher yields

Crown is the only company that develops custom, end-to-end processing solutions for upcycling proteins and lipids. By combining our engineering and equipment expertise with a deep understanding of every step in the value chain—from raw materials to waste source to saleable end products—Crown’s tailored approach delivers greater efficiencies and higher yields from recovered waste. With PLUS, your operation also benefits from pilot testing in our state-of-the-art facility, installation, commissioning, training, aftermarket support and assistance with bringing your products to market.

PLUS-up your operation with Crown innovation.

Eliminate landfill disposal costs and unlock new revenue streams with Crown’s expertise and state-of-the-art Innovation Center. Our 15,000 square-foot fully functional plant is the ideal incubator for testing and developing new products from waste sources. With real-world capabilities in a controlled, confidential environment and deep process engineering expertise from our skilled team of innovative problem-solvers, Crown helps you evaluate and pursue secondary market opportunities while advancing your sustainability goals and achieving greater operational efficiencies. For identifying and engineering custom waste-to-value systems, Crown is your trusted, proven partner.

Protein Lipid Upcycling System™ (PLUS)

Transform your waste stream into a landfill-reducing revenue stream with PLUS from Crown.
