

# Superior Drying & Desolventization

MASTER IT.

## Maximize high-quality yield and minimize process costs with Crown.

Achieve a high-quality, solvent-free, end product — regardless of input — when you partner with Crown. As a leader in oilseed extraction for 70 years, Crown provides the technical expertise, guidance and proven technologies to improve current processes and develop new products. Crown's Global Innovation Center and state-of-the-art pilot plant meet your needs with a full range of drying and desolventization equipment, including continuous vacuum drying and energy-efficient vertical drying. With Crown, you can test evaporation of water and solvent-wet products in a confidential, real-world environment and identify the best options to maximize product quality and yield, more sustainably and cost-effectively.

*Master drying and desolventization — choose Crown for superior innovation, equipment and aftermarket support.*
