

The world demands biofuel.

SUPPLY IT.

Secure your competitive advantage with Crown's continuous process Liquids Pilot Plant.

Innovate and optimize your oils and fats processing by partnering with Crown. Our Innovation Center and new, first-of-its-kind Liquids Pilot Plant offer renewable fuel (renewable diesel/HVO, SAF and biodiesel pretreatment), edible oil and oleochemical companies access to a continuous process for testing, validating, scaling and commercializing any feedstock into high-value products. The Liquids Pilot Plant is backed by Crown's unmatched expertise, technology and full-service support. Conduct real-world testing on traditional oilseeds, emerging oilseeds and waste oils in a confidential, risk-free environment.

Lead the oils and fats processing industry with total confidence in your investment.
