

Give your hydrotreater catalyst more life.

DOUBLE IT.

**Crown technology delivers maximum contaminant removal to extend hydrotreater catalyst life.**

Get the cleanest possible feedstock delivered to your hydrotreater and achieve up to double catalyst life with Crown technology. Our rugged, robust **RD Ready™ Pretreatment System** is guaranteed to meet product specs for all common contaminants and drastically improve plant uptime by reducing the need for catalyst changeovers. Backed by the construction of 50+ biodiesel plants, design of 10+ renewable diesel pretreatment plants, and a propriety database of feedstock specs and results, Crown **RD Ready™** Pretreatment System protects your investment now, and in the future. **Protect your hydrotreater and your Renewable Diesel operation with CPM and Crown.**

Edible Oils | Biodiesel | Renewable Diesel | Oleochemical
