

Belt Conveyors

You Can Trust

DEPENDABLE MATERIAL CONVEYING AT SCALE

Engineered by CPM | Crown for reliable, high-capacity conveying.

CPM | Crown belt conveyor systems deliver continuous, high-capacity transport of flowable materials across long distances, while protecting product integrity and reducing operating costs. Ideal for horizontal and limited incline conveying, our belt conveyor systems provide efficient, reliable performance.

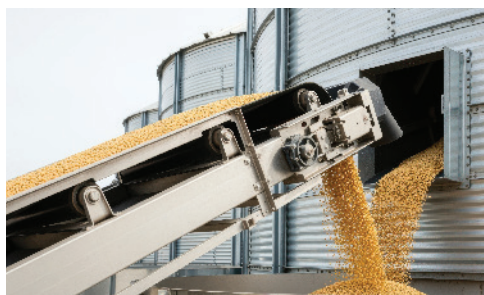

Fully enclosed configurations help maintain a cleaner operating environment while supporting consistent material flow in applications where dust control is critical. Energy-saving operation, extremely low failure rates and reduced maintenance requirements make CPM | Crown belt conveyors one of the most efficient and environmentally responsible conveying solutions available for oilseed processing facilities.

Industry-leading **Engineering and Support.**

Air-Supported Belt Conveyor

A cushion of air supports the belt, reducing friction, power consumption and component wear while enabling smooth, efficient conveying over long distances. Ideal for applications requiring strong dust control, these systems transport flowable materials horizontally or on inclines up to 10 degrees with minimal maintenance and exceptionally low failure rates—delivering one of the most energy-efficient conveying solutions available.

Single or Triple Roller Belt Conveyor

Roller-supported belt conveyors provide durable, high-capacity material transport for demanding applications.

Designed to handle heavier loads and longer spans, these systems deliver reliable, continuous conveying while maintaining product integrity. Single or triple roller configurations can be tailored to meet specific capacity, distance and structural requirements.

One call. Total support.

Our commitment to you doesn't stop at installation. **Lifecycle360™** is CPM | Crown's single-source support program, providing expert guidance and service across the full lifecycle of your facility—from pre-engineering through long-term operation—to help optimize efficiency, reduce risk and maximize uptime.

- One call connects you to single-source Lifecycle360 support
- Strategic global parts inventory ensures fast access to critical components
- Global service network helps you get back up and running quickly and confidently

Feeding, Fueling and Building **a Better World.**
