

Screw Conveyors

You Can Rely On

ACCURATE FEEDING AND CONTROLLED MATERIAL FLOW

Engineered by CPM | Crown for efficient, enclosed material handling.

CPM | Crown screw conveyors deliver precise, contained movement of bulk materials for oilseed processing applications requiring controlled conveying, feeding or distribution over short distances. Using helical flighting within a closed pipeline, these systems advance granular and small block materials horizontally or on an incline with balanced, accurate flow.

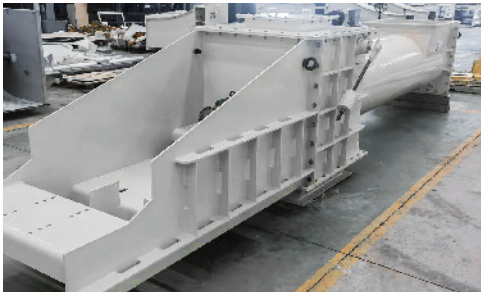

CPM | Crown screw conveyors can be configured to meet specific process requirements, handling everything from material transport to feed and discharge applications.

Industry-leading **Screw Conveyor Solutions.**

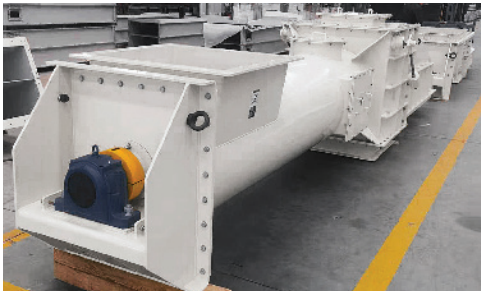

U-Trough

Ideal for horizontal or limited incline applications, U-Trough screw conveyors offer efficient movement with easy access for maintenance and cleaning.

Plug Screw

Designed to regulate and seal material flow, plug screw conveyors create a controlled discharge that is ideal for feeding downstream equipment or maintaining pressure and airlock integrity in critical process areas.

Tubular

Designed for enclosed environments, tubular screw conveyors support horizontal or inclined conveying while providing excellent containment and controlled material handling.

One call. Total support.

Our commitment to you doesn't stop at installation. **Lifecycle360™** is CPM | Crown's single-source support program, providing expert guidance and service across the full lifecycle of your facility—from pre-engineering through long-term operation—to help optimize efficiency, reduce risk and maximize uptime.

- One call connects you to single-source Lifecycle360 support
- Strategic global parts inventory ensures fast access to critical components
- Global service network helps you get back up and running quickly and confidently

Feeding, Fueling and Building **a Better World.**
